

the BEACH™ Model

You Gotta Try 'Em On!

The Beach™ model was the first shoe introduced under the Crocs brand Footwear label and has been a major part of the footwear industry's evolution towards comfort.

It's made from a patented closed-cell resin that, unlike hot and heavy rubber or plastic clogs, is extremely comfortable, cool and molds to your feet.

It features an orthotic foot bed, multiple ventilation ports, a slip-resistant sole, and weighs only ounces!

Stand on your feet all day without pain! The functionality and price make it a great choice for people who love comfortable shoes. They come in six sizes and fourteen colors that make them a fun fashion statement for young and old alike, with or without socks.

You'll need a couple of pairs to match every outfit!
